

## Proactive Health Assessment

Your dog's health is more than their genetic risk. It is a combination of genetics, diet, environment, and lifestyle factors. By empowering yourself with information about your dog, you and your vet can personalise how you manage your dog's health.

PetGen covers over 130 single-gene diseases and X complex genetic diseases.

If a risk for any of these genetic diseases is detected, it is flagged in your report. With this information, you and your vet can:

- Put in place prevention plans to minimise the impact of these diseases
- Look out for the early signs and treat early to reduce the impact of the disease later in life

In addition, the PetGen will predict your dog's likely adult size and life expectancy.

## Simple

You can collect mouth swab samples from your dog using our specific testing kit. EasyDNA will send the kit once we have processed your order and you can collect the swab samples quickly and painlessly from your dog following the instructions in the kit. Please email a photo of your pet when you return the samples for testing for your personalised breed certificate.

## About EasyDNA

EasyDNA is an international DNA testing company that specialises in providing reliable, accurate and confidential testing services to both the private and public sectors worldwide.

We offer high quality tests through our internationally accredited laboratory, backed by a team of highly experienced scientists. Our laboratory has performed over 250,000 DNA tests and has the experience to handle a wide range of cases.

At EasyDNA, we handle each enquiry with compassion and confidentiality.

**Choose EasyDNA for reliable results every time.**

# TRANSFORM THE WAY YOU CARE FOR YOUR DOG

Affordable and accurate  
dog breed & health test

## EasyDNA PetGen

By undertaking the PetGen Canine Breed & Health Test, you will learn about your dog's:

- Risk of developing genetic diseases
- Breed breakdown and likely family tree
- Breed-specific information to help you understand your dog better
- Hair trait report
- Behaviour trait report to get the best out of your dog

In addition, you will receive a personalised breed certificate.

## PetGen Breed Breakdown

The PetGen Canine Breed & Health Test covers over 180 dog breeds. Using your dog's saliva, we can learn the mix of breeds that make your dog unique.

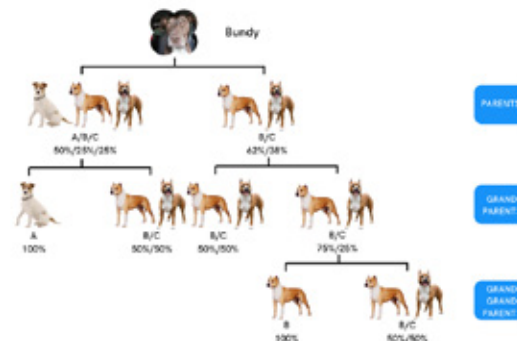

Bundy's owners thought he was a Staffordshire Bull Terrier and had a suspicion she was crossed with another breed. Using PetGen Bundy found out his's more Jack Russel Terrier than Staffordshire Bull Terrier with a little Amercian Staffordshire Terrier to round off his pedigree!

### Breed Identification Report

Lily is a mixed blood. The breed composition diagram is as follows:

With this information we can work out your dog's likely family tree.

## Trait Insights

By understanding your dog better, you can use this information to personalise how you manage their health and wellbeing.

Our trait report covers the behaviours that your dog is most likely to exhibit. Where it's appropriate, PetGen suggests ways to get the best out of your dog.

In the example below, of a behaviour trait assessment shows your dog in blue compared to all the other dogs in the PetGen database.

For example, you can see this dog is clever and obedient with the ability to learn commands quickly. If you teach this dog properly, it will be lifelong learner with you.
