

Saving lives even after they are gone

Increasingly DNA plays a role in predicting risk of serious diseases. This is called personalised medicine. Using your family's biological family tree, doctors can identify a family member's risk of developing a serious disease. Early detection leads to early treatment and survival.

By building your family's biological family tree you are preserving the DNA that tracks the changes that occur from one generation to the next.

With future breakthroughs in medicine this information can be used to personalise risk, detection, and treatment for family members when they are faced with important medical or ancestry questions.

Preserve their legacy.

About EasyDNA

EasyDNA is an international DNA testing company that specialises in providing reliable, accurate and confidential testing services to both the private and public sectors worldwide.

We offer high quality tests through our internationally accredited laboratory, backed by a team of highly experienced scientists. Our laboratory has performed over 250,000 DNA tests and has the experience to handle a wide range of cases.

At EasyDNA, we handle each enquiry with compassion and confidentiality.

Choose EasyDNA for reliable results every time.

PRESERVE THEIR DNA

So you can ask the questions only their DNA can answer, now and into the future

WHAT MAKES EasyDNA YOUR #1 CHOICE?

Legally defensible
– NATA accredited
laboratory

Safe, simple and
non-invasive
sample collection

Flexibility to
work with your
circumstances

Empowering the generations to come

The genetic information of a loved one who has died can hold important ancestry and medical history.

It allows families to ask questions like “what diseases run in our family”, “are we related” and “where did we come from”.

EasyDNA provides families with one of the last opportunities to preserve the deceased’s genetic information called DNA.

How stored DNA can be used

EasyDNA offers legal and non-legal DNA storage for three, five, ten and 15 years.

There are many reasons families may consider DNA storage including:

- Genetic testing
- Estate disputes
- Advances in new technology
- Keepsake
- Medical history

What is legal DNA Storage

Legal DNA Storage includes:

- Chain of Custody DNA Storage kit to doctor, samples returned to lab for storage
- Chain of Custody Profile + DNA Storage – Kit to doctor and samples returned to lab
- Option to store profile with legal team
- Legal profile provided ~~to client~~

What is the non-legal DNA Storage

Non-legal DNA Storage includes:

- The Peace of Mind Self Storage Kit includes 1 x Blood Spot FTA Card, 2x Blood Lancets, alcohol wipe, and storage pouch with desiccant
- Peace of Mind profile samples sent to lab, kit for self-storage
- Consent forms included for DNA Profile
